

# TRAFFIC SUMMARY

Figure 4. European Telecommunications Traffic Flows, 2001

**Key**

All figures are given in millions of minutes of telecommunications traffic for the public telephone network.

The map shows all intra-European routes with a combined 2001 volume of more than 200 million minutes.

Traffic Flows

Each band is proportional to the total annual traffic on the public telephone network in both directions between each pair of countries.

Total Outgoing Traffic

The area of each circle is proportional to the volume of the total annual outgoing traffic from each country.

Balance of Traffic

On routes where traffic in one direction accounts for more than 60 percent of the total, an arrow shows the direction most of the traffic flows.
